1/ My first [#TwitterFiles](#) report: how [@ScottGottliebMD](#) - a top Pfizer board member - used the same Twitter lobbyist as the White House to suppress debate on Covid vaccines, INCLUDING FROM A FELLOW HEAD OF [@US_FDA!](#)

Thanks [@elonmusk](#) for opening these files.

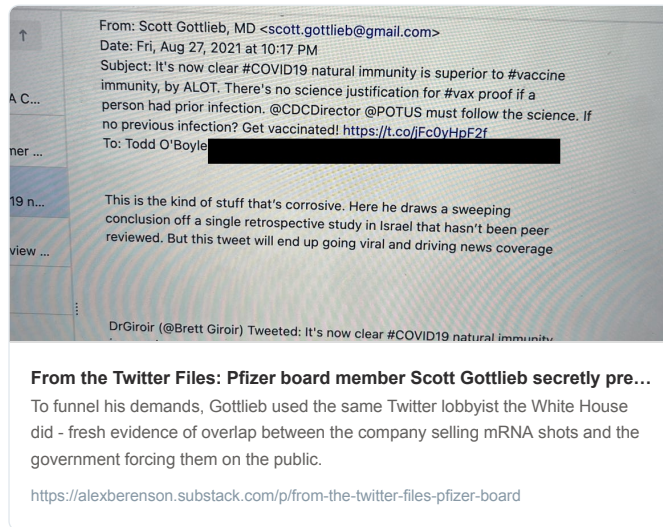

2/ In August 2021, Gottlieb told Todd O'Boyle - a senior manager in Twitter's public policy department - that a tweet from [@DrGiroir](#) claiming CORRECTLY that natural immunity was superior to vaccine immunity was "corrosive" and might "go viral."

3/ Twitter put a misleading tag on the tweet, preventing it from being shared. Gottlieb then went after a tweet about Covid's low risk to kids from [@justin_hart](#). Pfizer would soon win the okay for its mRNA shots for children, so keeping parents scared was crucial...

[@justin_hart](#) 4/ In October 2022, [@ScottGottliebMD](#) claimed on Twitter and CNBC that he was not trying to suppress debate on mRNA jabs. These files prove that Gottlieb - board member at a company that has made \$70 billion on the shots - did just that.
